

A Home That Can Power Itself

Say goodbye to electricity bills and rising prices by installing a Tesla Powerwall and solar system.

Increase the value of your home (proven by Rightmove) and earn a TAX FREE return on your savings well above interest rates. Perfect for those wanting to get their monthly outgoings as low as possible before they retire, homeowners wanting to do their bit for the environment, or simply as a smart investment.

Start your journey towards energy independence [Book a Drone Survey Today!](#)

Tesla Powerwall 3 is now available for installation in the UK.

The Tesla Powerwall 3 integrates the solar inverter and battery in one compact unit. Store your excess solar generation or off-peak energy from the grid to power your home, even during a power cut.

Prices from £12,950 fully installed. Save up to 100% of your electricity bill. Increase those savings by joining the Tesla Virtual Power Plant* and earn £10+ an hour supporting the grid during times of stress. Coming soon*.
